ZIMTU CAPITAL CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended May 31, 2011
(Unaudited)

1. NATURE OF OPERATIONS

The Company was incorporated in the Province of British Columbia on July 4, 2006, under the Business Corporations Act of British Columbia. The Company's principal business activities are investments in junior resource companies, mineral resource property acquisitions and dispositions and the provision of management services.

2. BASIS OF PRESENTATION

Basis of Presentation

The consolidated financial statements of the Company have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP").

These consolidated financial statements include the accounts of Zimtu Capital Corp. ("Zimtu") and its subsidiaries, 0755032 B.C. Ltd. ("0755032"), a wholly owned private company, and Triple Dragon Resources Inc. ("TDN"), a publicly traded company in which the Company has a 69.55% investment. Zimtu and its subsidiaries are collectively referred to as the "Company". The consolidated financial statements are issued under the name of the legal parent but are considered to be a continuation of 0755032.

All intercompany transactions and accounts have been eliminated upon consolidation.

3. SIGNIFICANT ACCOUNTING POLICIES

a) Financial instruments

The Company classifies its cash as held-for-trading.

The Company classifies its investments into held-to-trading or available-for-sale categories, investments that are bought and held principally for the purpose of selling them in the near term are classified as held-for-trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Investments not classified as held-for-trading are classified as available-for-sale and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in shareholders' equity. The fair value of substantially all investments is determined by quoted market prices, except for those investments that do not have a quoted market price in an active market, which are measured at cost.

The Company classifies its advances and accounts receivable as loans and receivables. After their initial fair value measurement, they are measured at amortized cost using the effective interest method.

The Company classifies accounts payable and accrued liabilities and unearned revenue as other financial liabilities. After their initial fair value measurement, they are measured at amortized cost using the effective interest method.

3. SIGNIFICANT ACCOUNTING POLICIES - Continued

b) Revenue recognition

Revenues are recognized on the following bases:

- (i) Interest income is recorded on an accrual basis at the stated interest rate over the term of the related instrument;
- (ii) Revenue from management and administrative services is recognized upon completion of the service, and when collectability is reasonably assured. Fees received in advance of services provided are recorded as deferred revenue.
- (iii) Realized gains on investments are recorded upon disposal of the investment, on a trade date basis; and
- (iv) Unrealized gains and losses arising from market prices in effect at the balance sheet date for held-for-trading investments are recorded at the balance sheet date.
- (v) Revenue from mineral sales is recognized at the time that title and risk of ownership have passed, collection is reasonably assured and the price is determinable.

c) Accounts receivable

The Company estimates the allowance for doubtful accounts provision based upon management analysis of specific receivables that are considered to be uncollectible.

d) Amortization

Equipment is recorded at cost. Amortization is provided using the straight-line method at the following annual rates:

Computer equipment	-	2 years
Office furniture	-	3 years
Leasehold Improvements	-	5 years (lease term)

Additions during the year are amortized on a pro-rata basis based on the annual amortization amount.

e) Income taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis, and losses carried forward. Future tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in operations in the period in which the change is enacted or substantively assumed. The amount of future income tax assets is limited to the amount of the benefit that is more likely than not to be realized.

3. SIGNIFICANT ACCOUNTING POLICIES - Continued

f) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of management estimates include the determination of impairment of investments in securities with no quoted market values and carrying values included mineral properties, rates of amortization, allowance for doubtful accounts, asset retirement obligations, fair values of share based payments, accrued liabilities, provision for income taxes, rates expected to apply when future income tax assets and liabilities are expected to be settled or recovered, the valuation allowance for future income tax asset, and the fair value of assets and liabilities acquired in a business combination. While management believes the estimates used are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

g) Goodwill

Goodwill represents the excess of the purchase price over the assigned value of net assets acquired. Goodwill is not amortized but is instead tested for impairment annually, or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairment is tested at the reporting unit level by comparing the reporting unit's carrying amount to its fair value. If the carrying value exceeds the reporting unit's fair value, there is a potential impairment in goodwill. Any impairment in goodwill is measured by allocation the fair value of the reporting unit in a manner similar to a purchase price allocation and comparing the notional goodwill from the fair value allocation to the carrying value of the goodwill.

h) Mineral property interests

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral resource properties. The Company has investigated title to all of its mineral properties and to the best of its knowledge, title to all of its properties are in good standing.

The Company capitalized all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed or the Company's mineral rights are allowed to lapse. All deferred mineral property expenditures are reviewed, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment.

ZIMTU CAPITAL CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended May 31, 2011

3. SIGNIFICANT ACCOUNTING POLICIES - Continued

h) Mineral property interests (continued)

When the carrying value of a property interest expense exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, joint venture expenditure commitments of the Company's assessment of its ability to sell the property interest for an amount exceeding the deferred costs, provision is made for the impairment in value.

From time to time, the Company may acquire or dispose of a mineral property interest, either by an option agreement or an acquisition agreement. As the consideration payable may consist of options, which are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are recorded as property costs or recoveries when the payments are made or received. Proceeds received on the sale of interests in mineral properties are credited to the carrying value of the mineral properties, with any excess included in operations.

i) Asset retirement obligations

The Company recognizes an estimate of the liability associated with an asset retirement obligation ("ARO") in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of the related asset. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to earnings in the period. The ARO can also increase or decrease due to change in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual results incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded. At present the Company has determined that it has no material AROs to record in the consolidated financial statements.

j) Non-controlling interest

Non-controlling interest exists in less than wholly-owned subsidiary of the Company and represented the outside interests' share of the carrying value of the subsidiary. When the subsidiary company issues its own shares to outside interests, a dilution gain or loss arises as a result of the difference between the Company's share of the proceeds and the carrying value of the underlying equity.

k) Financial instruments – disclosure and presentation, and Capital disclosure

- (i) The CICA handbook Section 1535, *Capital Disclosures*, which requires the disclosure of both qualitative and quantitative information that enables users of financial statements to evaluate the entity's objectives, policies and procedures for managing capital including disclosures of any externally imposed capital requirements and the consequences of non-compliance (Note 4).
- (ii) The CICA handbook Section 3862, *Financial Instruments - Disclosure*, which requires disclosure of information related to the significance of financial instruments to a company's financial position and performance. A company is also required to disclose information related to the risks of its use of financial instruments and how those risks are managed (Note 4).
- (iii) The CICA handbook Section 3863, *Financial Instruments – Presentation*, which establishes standards for presentation of financial instruments. It deals with the presentation of financial instruments and the circumstances in which financial assets and financial liabilities are offset. The adoption of this standard did not have a material effect on the financial position or earnings of the Company.

l) Warrants

Proceeds from issuances by the Company of units consisting of shares and warrants are allocated based on the residual method, whereby the carrying amount of the warrants is determined based on any difference between gross proceeds and the estimated fair market value of the shares. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants.

m) Related party transactions

All monetary transactions in the normal course of operations are measured at the exchange value which is determined by management to approximate fair value. Non-monetary related party transactions in the normal course of operations that have commercial substance and do not involve the exchange of property or product held for sale are also measured at the exchange value. The commercial substance requirement is met when the future cash flows associated with the transfer of property are expected to change significantly as a result of the transaction. All other related party transactions are recorded at the carrying value.

n) Earnings (loss) per share

Earnings (loss) per share are calculated using the weighted average number of shares outstanding.

The Company uses the treasury stock method for computing diluted earnings (loss) per share. This method assumes that any proceeds obtained upon exercise of options or warrants would be used to purchase common shares at the average market price during the period.

Diluted earnings (loss) per share are equal to loss per share as the effect of applying the treasury stock method is anti-dilutive.

o) Stock-based compensation

The Company reports and records all stock-based transactions following the guidelines of CICA Handbook Section 3870 using the fair-value method for recording all stock-based compensation to employees or directors and consultants. The fair value of options and other stock based awards to employees or consultants, issued or altered in the period, are determined using the Black-Scholes option pricing model. The Company records the fair value of the awards to the appropriate expense account or property interest at the time of grant or alteration. Where vesting provisions exist for stock-based awards, the fair value is determined at the grant date and recognized over the expected service period. Upon the exercise of stock options or agents' warrants, the fair value of the share based award is allocated to share capital

(p) Long-lived assets and impairment

The carrying values of long-lived assets with fixed or determinable lives are reviewed for impairment whenever events or changes in circumstances indicate the recoverable value may be less than the carrying amount. Recoverable value determinations are based on management's estimates of undiscounted future net cash flows expected to be recovered from specific assets or groups of assets through use or future disposition. Impairment charges are recorded in the period in which determination of impairment is made by management.

Assets with indefinite or indeterminable lives are not amortized and are reviewed for impairment on a reporting period basis using fair value determinations through management's estimate of recoverable value.

(q) Adoption of new accounting standards

In December 2009, the Company adopted the new accounting standards issued by the CICA relating to goodwill and intangible assets, mining and exploration costs and financial instrument disclosure. These standards were adopted on a prospective basis and are primarily related to disclosures. There were no adjustments recorded to opening balance sheet items or deficit as a result of the adoption of these standards.

EIC – 174 mining exploration costs

In March, 2009, the CICA issued EIC 174. In this EIC, the Committee reached a consensus that an enterprise that has initially capitalized exploration costs has an obligation in the current and subsequent accounting periods to test such costs for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. The EIC is effective for periods ending after the issuance date and the Company has adopted the EIC – 174. The adoption of this section does not have a significant impact on the financial statements.

q) Adoption of new accounting standards - continued

Amendment to financial instruments-disclosures

CICA Handbook Section 3862, Financial Instruments-Disclosures was amended to require disclosure about the inputs used in making fair value measurements, including their classification within a hierarchy that prioritizes their significance. The three levels of the fair value hierarchy are:

- Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3 - Inputs that are not based on observable market data.

See Note 4 for relevant disclosure.

r) New accounting standards not yet adopted

Convergence with international financial reporting standards ("IFRS")

In February 2008, the Canadian Accounting Standards Board announced that 2011 is the changeover date for publicly-listed companies to use IFRS, replacing Canada's own generally accepted accounting principles. The date is for interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. The transition date of the Company will be December 1, 2011 and will require the restatement for comparative purposes of amounts reported by the Company for the year ended November 30, 2010.

Business combinations – section 1582

In January 2009, the CICA issued Section 1582, Business Combinations, which will provide the Canadian equivalent to International Financial Reporting Standard IFRS 3, Business Combinations, and replace the existing Section 1581, Business Combinations. The new standard will apply prospectively to business combinations for which the acquisition date is on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year, in which case an entity would also early adopt Section 1601, Consolidated Financial Statements and Section 1602, Non-controlling Interests. Management does not expect that the adoption of this new standard will have significant impact on the Company's financial statements.

Non-controlling interests – section 1602

In January 2009, the CICA issued Section 1602, Non-Controlling Interests, which establishes standards for accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. It is equivalent to the corresponding provisions of IFRS International Accounting Standard ("IAS") 27, Consolidated and Separate Financial Statements. The new standard is effective for interim and annual consolidated financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption is permitted as of the beginning of a fiscal year, in which case an entity would also early adopt Section 1582, Business Combinations, and Section 1601, Consolidated Financial Statements. Management does not expect that the adoption of this new standard will have significant impact on the Company's financial statements.

4. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES

The investment operations of the Company's business involve the purchase and sale of securities and, accordingly, the majority of the Company's assets are currently comprised of financial instruments. The use of financial instruments can expose the Company to several risks, including market, credit and liquidity risk. A discussion of the Company's use of financial instruments and their associated risk is provided below:

a) Fair value

The carrying values of cash, advances and accounts receivable, unearned revenue, and accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of these financial instruments.

The fair value of investments is based on quoted market values, except for those investments that do not have a quoted market price in an active market, which are measured at cost, as currently there is not an active market for those investments. The Company does not have a timeline as to the disposition of those investments that do not have a quote market price in an active market.

b) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary current assets and current liabilities.

c) Credit risk

The Company is not exposed to significant credit risk on its cash and investments due to cash and investments being placed with major financial institutions. All transactions executed by the Company in listed securities are settled or paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Management believes that the credit risk with respect to receivables is remote. One customer accounted for 82% (2010: 83%) of the Company's administrative revenue (Note 11 (a)).

d) Currency risk

The Company is not exposed to significant currency risk on fluctuations considering that its assets and liabilities are stated in Canadian dollars.

e) Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected as a result of downturn in stock market conditions generally or related to matters specific to the Company, or if the value of the Company's investments declines, resulting in losses upon disposition. The Company generates cash flow primarily from its administrative activities and proceeds from the disposition of its investments. The Company has sufficient investments that are freely tradable and relatively liquid to fund its obligations as they become due under normal operating conditions.

4. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES - Continued

f) Market risk

Market risk is the risk that the fair value of or future cash flows from the Company's financial instruments will significantly fluctuate because of changes in market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favourable prices.

The Company manages market risk by having a portfolio that is not singularly exposed to any one issuer or class of issuers. The Company's investment activities are currently concentrated primarily across several sectors in the natural resource industry, potash, precious metals, base metals, rare earth elements, and rare metals. The Company also has set thresholds on purchases of investments.

Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar. As the Company has not yet developed commercial mineral interests, it is not exposed to commodity price at this time.

g) Capital management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to meet its daily operating expenses. The Company may raise additional capital for additional cash required. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to identify and acquire new investment or business opportunities.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the six months ended May 31, 2011, or the year ended November 30, 2010. The Company is not subject to externally imposed capital requirements.

5. INVESTMENTS - Continued

- (a) The Company classifies all of its investments as held-for-trading, except for the investments in Doubloon Resources, Elissa Resources, Jack's Fork Exploration, Mogul Ventures, Regal Uranium, Discovery Harbour, La Camera Mining, PAX Food AG, Altan Rio Minerals, Pacific Polar Energy, and Tyko Resources which are classified as available-for-sale.
- (b) During the year ended November 30, 2009, the Company acquired 50,000 common shares (their shares were subsequently split 1:15) of 0859404 B.C. Ltd. ("0859404") for \$25,000. At November 30, 2009, the Company held 20.83% of the issued and outstanding common shares of 0859404, and the two companies were related by a common director and officer. As the Company exerted significant influence over 0859404, the Company accounted for its investment using the equity method. During the year ended November 30, 2009, the Company incurred losses of \$nil as a result of its proportional share of equity losses recorded in 0859404. During the year ended November 30, 2010, 0859404 issued additional common shares, of which Zimtu acquired 2,131,250 additional shares. Following the issuance of shares, Zimtu's holdings decreased to 15% of the total issued and outstanding shares of 0859404. As a result, the investment is no longer being accounted for using the equity method. In December 2010, the 2,881,250 shares of 0859404 were converted into shares of Quantum Rare Earth Development. As of May 31, 2011, 50% of those shares have been released from escrow.
- (c) As at May 31, 2011, the Company owns 27% of the total outstanding shares of Camisha Resources Corp. ("Camisha") (see Note 10). The Company exerts significant influence over Camisha and therefore Camisha is accounted for as an investment under the equity method. The investment in Camisha is recorded at cost of \$150,000 and is adjusted for \$28,048 of equity loss.
- (d) During the year ended November 30, 2010, the Company acquired 5,165,000 common shares of Lakeland Resources Inc. ("Lakeland") for \$437,975, which represents 34% of total issued and outstanding shares of Lakeland. The investment in Lakeland is recorded at cost of \$437,975 and is adjusted for \$106,287 of equity loss.

6. MINERAL PROPERTY INTERESTS

Triple Dragon Resources Inc. ("TDN") Properties

The Company owns 69.55% (2010:69.83%) of the issued and outstanding common shares of TDN and has therefore included descriptions of the properties owned by TDN below.

Murray Property

On April 17, 2008, the Company sold TDN a 100% interest in the Murray Claims in the Yellowknife Mining Division of the Northwest Territories, known as the Murray Property. There was a 1% net smelter return royalty and a 1% gross overriding royalty on the property, in favour of Jody Dahrouge, the original vendor of the property, which was relinquished on May 7, 2009.

Joint Venture Properties

C&C Rare Earth Property

During the year ended November 30, 2009, the Company entered into an agreement with Cathro Resources Corp. and Cazador Resources Ltd. (“C&C”) for the joint exploration of rare earth element claims of merit in Western Canada, known as the C&C Rare Earth Properties. The claims included in the C&C Rare Earth Properties are the Hiren, Trident and Zen Claims. The Company and the other joint venturers contributed \$10,000 (paid) each for the acquisition costs of the C&C Rare Earth Properties. The Company will commit \$100,000 towards the advancement of the C&C Rare Earth Properties. The C&C Rare Earth Properties will be held on a 50-50% joint venture basis, and the proceeds from the sale of the property will be shared equally by the Company and the other joint ventures.

Javorsky Properties

During the year ended November 30, 2010, the Company entered into an agreement for the joint exploration of four rare earth element claims of merit in Western Canada, known as the Old Lime Stone, Zirconium Mountain, Cerium Mountain, and Odin Creek Cerium. The Company and the other joint venturer, Dave Javorsky, each contributed for the acquisition costs of the property. The property will be held on a 50-50% joint venture basis, and the proceeds from the sale of the property will be shared equally by the Company and the other joint venturer.

Tanzania Property

In August, 2010, the Company entered into a partnership with Strategic Resource Management (“Strategic”) for a rare earth property in Tanzania. The Company has spent \$8,400 US for field work and had the exclusive option to acquire the project for \$45,000 US. This project has been terminated and the value of the project written off.

Kubawa Property

On April 13, 2011, the Company entered into an agreement for the joint acquisition and sale of iron properties of merit in Australia with Kubwa Iron Ore Holdings Pty Ltd. (“Kubwa”). Kubwa is a private Australian company, wholly owned by Strategic Resource Management Pty Ltd. (“Strategic”). Zimtu will contribute \$50,000 on signing of the agreement (paid) and contribute up to \$50,000 to fund additional iron tenement applications for Kubwa (paid). After the 50/50% joint venture is formed, the proceeds from the sale of any or all of the tenements/permits will be shared equally by the Company and Kubwa; however, Zimtu will be entitled to the first portion of any cash consideration received for the tenements/permits equal to 50% of the amount contributed for additional tenement applications. If the maximum \$50,000 is spent on additional tenement applications, Zimtu will be entitled to the first \$25,000 of any cash consideration received.

Properties with Pending Sales

Day Property

On August 4, 2010, the Company announced that it has acted as one of the property vendors in Equitas Resources Corp.'s ("Equitas") (formerly Trivello Energy Corp.'s) acquisition of the Day Copper-Gold Porphyry Property located in north-central British Columbia. For its participation in the Equitas transaction, the Company will receive C\$25,000 and 2,500,000 common shares (received subsequent to May 31, 2011). The vendors will retain a 2% Net Smelter Return ("NSR") royalty, 1% of which may be purchased by Equitas for C\$1,000,000.

Snip and Seebach Properties

On November 22, 2010, the Company announced that it and one of its prospecting partners had signed an option agreement with Remstar Resources Ltd. whereby Remstar can earn a 60% interest in the Snip and Seebach 02-03 rare-earth-element properties located in the Carbo area of northeastern British Columbia. For its participation in the transaction, the Company was to receive staged cash payments totalling \$175,000. Remstar was also required to complete exploration expenditures totalling \$5-million over four years. The vendors would retain a 2% net smelter royalty on the properties.

Subsequent to the quarter ending May 31, 2011, Remstar and the Company renegotiated the terms of the option agreement. As a result of the signing of the revised agreement, Remstar will now acquire a 100% interest in the properties by paying \$25,000 (paid) and issuing a total of two million common shares over two years to the Company and incurring exploration expenditures of \$850,000 over three years. Zimtu's partner will receive cash and share consideration equal to that of Zimtu. The vendors will retain a 2% net smelter returns royalty on the properties. The agreement was accepted by the TSX Venture Exchange on July 25, 2011.

Old Lime Stone Property

On November 17, 2010, the Company and one of its prospecting partners optioned a 100% interest in the Old Lime Stone property to Arctic Star Diamond Corp. ("Arctic Star"). In consideration for the option, the Company will receive staged cash payments totalling \$25,000 (\$12,500 received) and 1,000,000 common shares (500,000 shares). The vendors will retain a 2% net smelter royalty (NSR) on the properties.

Red Wine Property

On September 2, 2010, the Company announced its 50% participation into an agreement with Rare Earth Metals Inc. ("Rare Earth") pursuant to which Rare Earth will acquire a 100% interest in mining claims totalling 508 claim units located in the Red Wine/Letitia Lake area of west central Labrador. For its participation in the transaction, the Company will receive staged payments of \$75,000 (\$25,000 received) and 1,000,000 common shares (500,000 received) of Rare Earth over a two year period. 9. ACQUISITION OF TRIPLE DRAGON RESOURCES INC.

On April 16, 2008, the Company acquired a 75.25% interest in Triple Dragon Resources Inc. for cash of \$601,751. The Company used the purchase method to account for the transaction. The purchase price has been allocated as follows:

Cash	\$	611,846
Accounts receivable		3,500
Prepaid expenses		63,000
Accounts payable		(12,357)
Goodwill		100,594
Non-controlling interest		(164,832)
	\$	601,751

Subsequent to the purchase and prior to November 30, 2008, the Company increased its interest in TDN to 76.10%. During the year ended November 30, 2009, the Company's interest was reduced to 70.08% and a dilution gain of \$150,005 was recorded. The remaining 30.17% was reflected on the consolidated balance sheets within non-controlling interests. TDN's income (loss) were included in the Company's net income (loss) and adjusted to reflect the portion attributable to the non-controlling interests.

During the six months ended May 31, 2011, the Company's interest was reduced to 69.55% (2010 - 69.83%) due to the issuance of shares to a vendor for a property payment, and a dilution gain of \$nil (2010 - \$7,951) was recorded.

10. ACQUISITION OF CAMISHA RESOURCES CORP.

On October 15, 2009, the Company acquired 3,000,000 common shares of Camisha, which was incorporated on October 1, 2009, under the laws of British Columbia and did not hold any significant assets and liabilities at the date of acquisition. At November 30, 2009, the Company held 60% of the issued and outstanding common shares of Camisha. As a result, the results of operations of Camisha have been consolidated from the date of acquisition for the year ending November 30, 2009. The remaining 40% was reflected on the consolidated balance sheets within non-controlling interests, and Camisha's losses were adjusted to reflect the portion attributable to the non-controlling interests.

As at November 30, 2010 and May 31, 2011, the Company owns 27% of the total outstanding shares and therefore does not include Camisha in the current year's consolidated statements. Camisha is accounted for as an investment under the equity method. Camisha commenced trading May 27, 2010 on the TSX Venture Exchange.

The Company has approximately \$1,286,000 of non-capital losses available, which begin to expire in 2026 through to 2030 and may be applied against future taxable income. The potential future benefits associated with some of these losses are not reflected in the consolidated financial statements as it can not be considered more likely than not that they will be utilized.

ZIMTU CAPITAL CORP.
Notes to the Consolidated Financial Statements
For the Six Months Ended May 31, 2011
(Unaudited)

14. SUBSEQUENT EVENTS

- (a) On June 7, 2011, the Company announced that Zimtu and two prospecting partners have completed an agreement with Rare Earth Metals Inc. ("Rare Earth") whereby Rare Earth can earn a 100% interest in 40 unpatented claim units totaling 647 hectares that make up a part of their newly acquired Lavergne Rare Earth Element ("REE") Prospect located 80 kilometres east of Sudbury, Ontario. For its participation in the transaction, Zimtu will receive staged payments of \$100,000 (\$25,000 received subsequent to May 31, 2011) and 1,000,000 common shares (250,000 shares received subsequent to May 31, 2011) over a 24-month period. Zimtu's two acquisition partners will together receive cash and share consideration equal to that of Zimtu. The vendors will collectively retain a 2% Net Smelter Royalty on the claims; 1% of which can be purchased by Rare Earth for \$1,000,000. The agreement was accepted by the TSX Venture Exchange on June 17, 2011.
- (b) On June 16, 2011, the Company announced that Zimtu and one of its prospecting partners have signed an agreement with Solace Resources Corp. ("Solace") whereby Solace can earn a 100% interest in the Blachford Rare Earth Element ("REE") Property located in the Northwest Territories approximately 100 kilometres southeast of the city of Yellowknife. The property is contiguous to Avalon Rare Metals Inc.'s ("Avalon") Thor Lake REE Project. For its participation in the transaction, Zimtu will receive staged payments totaling \$100,000 and 1,250,000 common shares over a 18-month period. Zimtu's partner, 877384 Alberta Ltd. will receive cash and share consideration equal to that of Zimtu. The vendors will collectively retain a 2% Net Smelter Returns Royalty on the property; 1% of which can be purchased by Solace for \$1,000,000. The transaction is subject to acceptance by the TSX Venture Exchange. In conjunction with the completion of the transaction, a finder's fee will be payable in accordance with the policies of the TSX Venture Exchange.
- (c) Subsequent to the six months ended May 31, 2011, 8,900 stock options were exercised at \$0.90 for proceeds of \$8,010.
