**1. NATURE OF OPERATIONS**

The Company was incorporated in the Province of British Columbia on July 4, 2006 under the Business Corporations Act of British Columbia. The Company's principal business activities are investments in junior resource companies, mineral resource property acquisition and disposition and the provision of management services.

**2. BASIS OF PRESENTATION, NAME CHANGE AND REVERSE TAKEOVER**

**Basis of Presentation**

The consolidated financial statements of the Company have been prepared in accordance with Canadian generally accepted accounting principles ("GAAP").

These consolidated financial statements include the accounts of Zimtu Capital Corp. ("Zimtu") and its subsidiaries, 0755032 B.C. Ltd. ("0755032"), a wholly owned private company, and Triple Dragon Resources Inc. ("TDN"), a publicly traded company in which the Company has a 69.83% investment. Zimtu and its subsidiaries are collectively referred to as the "Company".

Further to the Reverse Takeover ("RTO") transaction described below, these consolidated financial statements for the nine months ended August 31, 2010 and the year ended November 30, 2009 reflect the assets, liabilities, and results of operations of 0755032, prior to the RTO, and the consolidated assets, liabilities, and results of the Company subsequent to the RTO. The consolidated financial statements are issued under the name of the legal parent but are considered to be a continuation of 0755032.

All intercompany transactions and accounts have been eliminated upon consolidation.

**Reverse Takeover & Name Change**

On July 31, 2008, Flow Energy Ltd. ("Flow") changed its name to Zimtu Capital Corp. ("Zimtu"). On July 31, 2008, Zimtu completed the acquisition of all the outstanding common shares of 0755032, in exchange for 50,000,000 Special Warrants at a fair price of \$0.12 per Special Warrant. The Special Warrants automatically converted to shares of Zimtu on December 1, 2008.

The transaction constituted a reverse takeover (the "RTO") of Zimtu by 0755032.

**2. BASIS OF PRESENTATION, REVERSE TAKEOVER & NAME CHANGE - Continued****Reverse Takeover (continued)**

The net assets acquired were as follows:

Cash	\$	85,242
Receivables		7,471
Prepaid expenses		2,916
Accounts payable and accrued liabilities		(85,153)
	\$	<u>10,476</u>

The acquisition of the shares of 0755032 B.C. Ltd. was accounted for as an RTO transaction in accordance with guidance provided in Emerging Issues Committee (“EIC”) Abstract No. 10. Zimtu was originally classified as a Capital Pool Company (“CPC”) as defined in the TSX Venture Exchange Policy 2.4. It did not qualify as a business for accounting purposes, and accordingly the transaction was accounted for as an issuance of securities by 0755032 for the net monetary assets of Zimtu for \$10,476.

Subsequent to the RTO, Zimtu changed its fiscal year end from August 31 to November 30. Its first year end after the RTO was November 30, 2008.

**3. SIGNIFICANT ACCOUNTING POLICIES****a) Financial instruments**

The Company classifies its cash as held-for-trading.

The Company classifies its investments into held-to-trading or available-for-sale categories, investments that are bought and held principally for the purpose of selling them in the near term are classified as held-for-trading securities and are reported at fair value, with unrealized gains and losses recognized in earnings. Investments not classified as held-for-trading are classified as available-for-sale and are carried at fair market value, with the unrealized gains and losses, net of tax, included in the determination of comprehensive income and reported in shareholders’ equity. The fair value of substantially all investments is determined by quoted market prices, except for those investments that do not have a quoted market price in an active market, which are measured at cost.

The Company classifies its advances and accounts receivable as loans and receivables. After their initial fair value measurement, they are measured at amortized cost using the effective interest method.

The Company classifies accounts payable and accrued liabilities and unearned revenue as other financial liabilities. After their initial fair value measurement, they are measured at amortized cost using the effective interest method.

b) Revenue recognition

Revenues are recognized on the following bases:

- (i) Interest income is recorded on an accrual basis at the stated interest rate over the term of the related instrument;
- (ii) Revenue from management and administrative services is recognized upon completion of the service, and when collectability is reasonably assured. Fees received in advance of services provided are recorded as deferred revenue.
- (iii) Realized gains on investments are recorded upon disposal of the investment, on a trade date basis; and
- (iv) Unrealized gains and losses arising from market prices in effect at the balance sheet date for held-for-trading investments are recorded at the balance sheet date.
- (v) Revenue from mineral sales is recognized at the time that title and risk of ownership have passed, collection is reasonably assured and the price is determinable.

c) Accounts receivable

The Company estimates the allowance for doubtful accounts provision based upon management analysis of specific receivables that are considered to be uncollectible.

d) Amortization

Equipment is recorded at cost. Amortization is provided using the straight-line method at the following annual rates:

Computer equipment	-	2 years
Office furniture	-	3 years
Leasehold Improvements	-	5 years (lease term)

Additions during the year are amortized on a pro-rata basis based on the annual amortization amount.

e) Income taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, future tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis, and losses carried forward. Future tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on future tax assets and liabilities of a change in tax rates is recognized in operations in the period in which the change is enacted or substantively assumed. The amount of future income tax assets is limited to the amount of the benefit that is more likely than not to be realized.

f) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of management estimates include the determination of impairment of investments in securities with no quoted market values and carrying values included mineral properties, rates of amortization, allowance for doubtful accounts, asset retirement obligations, fair values of share based payments, accrued liabilities, provision for income taxes, rates expected to apply when future income tax assets and liabilities are expected to be settled or recovered, the valuation allowance for future income tax asset, and the fair value of assets and liabilities acquired in a business combination. While management believes the estimates used are reasonable, actual results could differ from those estimates and could impact future results of operations and cash flows.

g) Goodwill

Goodwill represents the excess of the purchase price over the assigned value of net assets acquired. Goodwill is not amortized but is instead tested for impairment annually, or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. Impairment is tested at the reporting unit level by comparing the reporting unit's carrying amount to its fair value. If the carrying value exceeds the reporting unit's fair value, there is a potential impairment in goodwill. Any impairment in goodwill is measured by allocation the fair value of the reporting unit in a manner similar to a purchase price allocation and comparing the notional goodwill from the fair value allocation to the carrying value of the goodwill.

h) Mineral property interests

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral resource properties. The Company has investigated title to all of its mineral properties and to the best of its knowledge, title to all of its properties are in good standing.

The Company capitalized all costs related to investments in mineral property interests on a property-by-property basis. Such costs include mineral property acquisition costs and exploration and development expenditures, net of any recoveries. Costs are deferred until such time as the extent of mineralization has been determined and mineral property interests are either developed or the Company's mineral rights are allowed to lapse. All deferred mineral property expenditures are reviewed, on a property-by-property basis, to consider whether there are any conditions that may indicate impairment.

**3. SIGNIFICANT ACCOUNTING POLICIES - Continued**

h) Mineral property interests (continued)

When the carrying value of a property interest expense exceeds its net recoverable amount that may be estimated by quantifiable evidence of an economic geological resource or reserve, joint venture expenditure commitments of the Company's assessment of its ability to sell the property interest for an amount exceeding the deferred costs, provision is made for the impairment in value.

From time to time, the Company may acquire or dispose of a mineral property interest, either by an option agreement or an acquisition agreement. As the consideration payable may consist of options, which are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are recorded as property costs or recoveries when the payments are made or received. Proceeds received on the sale of interests in mineral properties are credited to the carrying value of the mineral properties, with any excess included in operations.

i) Asset retirement obligations

The Company recognizes an estimate of the liability associated with an asset retirement obligation ("ARO") in the financial statements at the time the liability is incurred. The estimated fair value of the ARO is recorded as a long-term liability, with a corresponding increase in the carrying amount of the related asset. The liability amount is increased each reporting period due to the passage of time and the amount of accretion is charged to earnings in the period. The ARO can also increase or decrease due to change in the estimates of timing of cash flows or changes in the original estimated undiscounted cost. Actual results incurred upon settlement of the ARO are charged against the ARO to the extent of the liability recorded. At present the Company has determined that it has no material AROs to record in the consolidated financial statements.

j) Non-controlling interest

Non-controlling interest exists in less than wholly-owned subsidiary of the Company and represented the outside interests' share of the carrying value of the subsidiary. When the subsidiary company issues its own shares to outside interests, a dilution gain or loss arises as a result of the difference between the Company's share of the proceeds and the carrying value of the underlying equity.

k) Financial instruments – disclosure and presentation, and Capital disclosure

- (i) The CICA handbook Section 1535, *Capital Disclosures*, which requires the disclosure of both qualitative and quantitative information that enables users of financial statements to evaluate the entity's objectives, policies and procedures for managing capital including disclosures of any externally imposed capital requirements and the consequences of non-compliance (Note 4).
- (ii) The CICA handbook Section 3862, *Financial Instruments - Disclosure*, which requires disclosure of information related to the significance of financial instruments to a company's financial position and performance. A company is also required to disclose information related to the risks of its use of financial instruments and how those risks are managed (Note 4).
- (iii) The CICA handbook Section 3863, *Financial Instruments – Presentation*, which establishes standards for presentation of financial instruments. It deals with the presentation of financial instruments and the circumstances in which financial assets and financial liabilities are offset. The adoption of this standard did not have a material effect on the financial position or earnings of the Company.

l) Warrants

Proceeds from issuances by the Company of units consisting of shares and warrants are allocated based on the residual method, whereby the carrying amount of the warrants is determined based on any difference between gross proceeds and the estimated fair market value of the shares. If the proceeds from the offering are less than or equal to the estimated fair market value of shares issued, a nil carrying amount is assigned to the warrants.

m) Related party transactions

All monetary transactions in the normal course of operations are measured at the exchange value which is determined by management to approximate fair value. Non-monetary related party transactions in the normal course of operations that have commercial substance and do not involve the exchange of property or product held for sale are also measured at the exchange value. The commercial substance requirement is met when the future cash flows associated with the transfer of property are expected to change significantly as a result of the transaction. All other related party transactions are recorded at the carrying value.

n) Earnings (loss) per share

Earnings (loss) per share are calculated using the weighted average number of shares outstanding.

The Company uses the treasury stock method for computing diluted earnings (loss) per share. This method assumes that any proceeds obtained upon exercise of options or warrants would be used to purchase common shares at the average market price during the period.

Diluted earnings (loss) per share are equal to loss per share as the effect of applying the treasury stock method is anti-dilutive.

o) Stock-based compensation

The Company reports and records all stock-based transactions following the guidelines of CICA Handbook Section 3870 using the fair-value method for recording all stock-based compensation to employees or directors and consultants. The fair value of options and other stock based awards to employees or consultants, issued or altered in the period, are determined using the Black-Scholes option pricing model. The Company records the fair value of the awards to the appropriate expense account or property interest at the time of grant or alteration. Where vesting provisions exist for stock-based awards, the fair value is determined at the grant date and recognized over the expected service period. Upon the exercise of stock options or agents' warrants, the fair value of the share based award is allocated to share capital

(p) Long-lived assets and impairment

The carrying values of long-lived assets with fixed or determinable lives are reviewed for impairment whenever events or changes in circumstances indicate the recoverable value may be less than the carrying amount. Recoverable value determinations are based on management's estimates of undiscounted future net cash flows expected to be recovered from specific assets or groups of assets through use or future disposition. Impairment charges are recorded in the period in which determination of impairment is made by management.

Assets with indefinite or indeterminable lives are not amortized and are reviewed for impairment on a reporting period basis using fair value determinations through management's estimate of recoverable value.

(q) Accounting standards newly adopted

(i) Section 1400, General Standards of Financial Statement Presentation

In June 2007, the CICA handbook Section 1400 was amended to include requirements to assess an entity's ability to continue as a going concern and disclose any material uncertainties that cast doubt on its ability to continue as a going concern. The mandatory effective date is for annual and interim financial statements for years beginning on or after January 1, 2008. This new requirement was adopted by the Company effective December 1, 2008. The adoption of this Section did not have an impact on the consolidated financial statements.

(ii) Section 3064, Goodwill and Intangible Assets

In February 2008, the CICA issued this new section to replace Section 3062, *Goodwill and Other Intangible Assets* and establish standards for the recognition, measurement and disclosure of goodwill and intangible assets. In addition, the CICA issued amendments to Section 1000, *Financial Statement Concepts* and AcG 11, *Enterprises in the Development Stage* and withdrew Section 3450, *Research and Development Costs*. EIC 27, *Revenues and Expenditures During the Pre-operating Period* is no longer applicable for entities that have adopted CICA 3064. The mandatory effective date is for annual and interim financial statements for years beginning on/after October 1, 2008. This new requirement was adopted by the Company effective December 1, 2008. The adoption of this Section did not have an impact on the financial statements

(r) New accounting standards not yet adopted

- (i) Section 1582, Business Combinations  
Section 1601, Consolidated Financial Statements  
Section 1602, Non-controlling Interests

In January 2009, the CICA issued Handbook Sections 1582 Business Combinations, 1601 Consolidated Financial Statements, and 1602 Non-controlling Interests, which replaces CICA Handbook Sections 1581 Business Combinations and 1600 Consolidated Financial Statements. Section 1582 establishes standards for the accounting for business combinations that is equivalent to the business combination accounting standard under International Financial Reporting Standards. Section 1582 is applicable for the Company's business combinations with acquisition dates on or after January 1, 2011. Early adoption of this Section is permitted. Section 1601 together with Section 1602 establishes standards for the preparation of consolidated financial statements. Section 1601 is applicable for the Company's interim and annual financial statements for its fiscal year beginning December 1, 2011. Early adoption of this Section is permitted. If the Company chooses to early adopt any one of these Sections, the other two sections must also be adopted. The Company is in the process of assessing the impact of these new sections on its consolidated financial statements.

- (ii) International Financial Reporting Standards ("IFRS")

In February 2008, the CICA Accounting Standards Board ("AcSB") confirmed the changeover to IFRS from GAAP will be required for publicly accountable enterprises effective for annual and interim financial statements relating to fiscal years beginning on or after January 1, 2011. The eventual changeover to IFRS represents changes due to new accounting standards. The transition from current GAAP to IFRS is a significant undertaking that may materially affect the Company's reported financial position and results of operations.

The Company is assessing the potential impact of this changeover and is developing its IFRS change plan, which will include project structure and governance, resourcing and training, analysis of key GAAP difference and a phase plan to assess accounting policies under IFRS as well as potential IFRS 1 exemption.

**4. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES**

The investment operations of the Company's business involve the purchase and sale of securities and, accordingly, the majority of the Company's assets are currently comprised of financial instruments. The use of financial instruments can expose the Company to several risks, including market, credit and liquidity risk. A discussion of the Company's use of financial instruments and their associated risk is provided below:

a) Fair value

The carrying values of cash, advances and accounts receivable, unearned revenue, and accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of these financial instruments.

The fair value of investments is based on quoted market values, except for those investments that do not have a quoted market price in an active market, which are measured at cost, as currently there is not an active market for those investments. The Company does not have a timeline as to the disposition of those investments that do not have a quote market price in an active market.

b) Interest rate risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary current assets and current liabilities.

c) Credit risk

The Company is not exposed to significant credit risk on its cash and investments due to cash and investments being placed with major financial institutions. All transactions executed by the Company in listed securities are settled or paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Management believes that the credit risk with respect to receivables is remote. One customer accounted for 95% (2009: 100%) of the Company's administrative revenue (Note 11 (a)).

d) Currency risk

The Company is not exposed to significant currency risk on fluctuations considering that its assets and liabilities are stated in Canadian dollars.

e) Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected as a result of downturn in stock market conditions generally or related to matters specific to the Company, or if the value of the Company's investments declines, resulting in losses upon disposition. The Company generates cash flow primarily from its administrative activities and proceeds from the disposition of its investments. The Company has sufficient investments that are freely tradable and relatively liquid to fund its obligations as they become due under normal operating conditions.

**4. FINANCIAL INSTRUMENTS AND CAPITAL DISCLOSURES - Continued**

f) Market risk

Market risk is the risk that the fair value of or future cash flows from the Company's financial instruments will significantly fluctuate because of changes in market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than favourable prices.

The Company manages market risk by having a portfolio that is not singularly exposed to any one issuer or class of issuers. The Company's investment activities are currently concentrated primarily across several sectors in the natural resource industry, uranium, potash, oil and gas, molybdenum, precious metals and base metals. The Company also has set thresholds on purchases of investments.

Commodity prices for minerals are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar. As the Company has not yet developed commercial mineral interests, it is not exposed to commodity price at this time.

g) Capital management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to meet its daily operating expenses. The Company may raise additional capital for additional cash required. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to identify and acquire new investment or business opportunity.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the nine months ended August 31, 2010. The Company is not subject to externally imposed capital requirements

**5. INVESTMENTS - Continued**

(b) During the year ended November 30, 2009, the Company acquired 50,000 common shares (these shares were subsequently split 1:15) of 0859404 B.C. Ltd. ("0859404") for \$25,000. At November 30, 2009, the Company held 20.83% of the issued and outstanding common shares of 0859404, and the two companies were related by a common director and officer. As the Company exerted significant influence over 0859404, the Company accounted for its investment using the equity method. During the year ended November 30, 2009, the Company incurred losses of \$nil as a result of its proportional share of equity losses recorded in 0859404. During the nine months ended August 31, 2010, 0859404 issued additional common shares, of which Zimtu acquired 2,131,250 additional shares. Following the issuance of shares, Zimtu's holdings decreased to 15% of the total issued and outstanding shares of 0859404. As a result, the investment is no longer being accounted for using the equity method.

**6. MINERAL PROPERTY INTERESTS**

**Triple Dragon Properties**

The Company has approximately \$1,015,000 of non-capital losses available, which begin to expire in 2026 through to 2030 and may be applied against future taxable income. The Company also has approximately \$155,000 of capital losses that may be carried forward and applied against future capital gains. The potential future benefits associated with some of these losses are not reflected in the consolidated financial statements as it can not be considered more likely than not that they will be utilized.

**14. SUBSEQUENT EVENTS**

- a) On September 2, 2010, the Company announced its 50% participation into an agreement with Rare Earth Metals Inc. ("Rare Earth") pursuant to which Rare Earth will acquire a 100% interest in mining claims totalling 508 claim units located in the Red Wine/Letitia Lake area of west central Labrador. For its participation in the transaction, the Company will receive staged payments of \$75,000 (\$25,000 received) and 1,000,000 common shares (500,000 received) of Rare Earth over a two year period. The vendors will retain a 2% Net Smelter Return ("NSR") royalty of which 1% may be purchased by Rare Earth for \$1,000,000. This deal was accepted by the TSX Venture Exchange on September 28, 2010.
- b) On September 23, 2010, the Company announced that it had completed initial field programs over a number of rare earth element projects staked in British Columbia as part of the Company's joint venture for project generation with private partners Cathro Resources Corp. and Cazador Resources Ltd., Dahrouge Geological Consulting Ltd. and Dave Javorsky.
