Arctic Star Commences Drilling, Diagas Diamond Property, NT

Arctic Star announce that the HQ diameter diamond drill program has begun on the Sequoia kimberlite complex. The first hole is situated 22 meters south of the original 2021 discovery hole. The proposed drill pattern is to drill a vertical hole to 200 meters in the interpreted east-west center of the kimberlite...

Zimtu Snapshot - Investment Portfolio Value

Historical Equity Value 2022

Each week, Zimtu publishes Snapshot, a look into our investment portfolio and the value of each of our holdings.

Investors can view each holding, how many shares we own, and the value each week. Also see the historic total equity value of our holdings for the past 12 months.

We create value for our clients, and we're proud to offer the transparency to show it.
