Core Assets Diamond Drilling Intersects CRD Mineralization in All Holes and Discovers Mo-Cu Porphyry Source of The Carbonate Replacement System at the Silver Lime Project

- Every drill hole completed at the Silver Lime Project to-date has intersected multiple chimney-style, massive sulfide carbonate replacement deposit (CRD) feeders (Figure 1).
- Diamond drilling at the Sulphide City Target has also intersected a Mo-Cu-bearing porphyry believed to be the source feeding the >250 high-grade carbonate replacement mineralization (CRM) occurrences observed at surface throughout the Silver Lime Porphyry-CRD Project.

Core Assets Drills 48.5m of 1.03% CuEq within 95m of 0.54% CuEq from Surface at the Laverdiere Skarn-Porphyry Project and Intersects 1.5m of 4.59g/t Au in the Lewellyn Fault Zone

- Assay results from the first two diamond drill holes completed at the French Adit have successfully confirmed massive to semi-massive Fe-Cu-Au skarn and local porphyry-style Cu mineralization and alteration that remains open at depth (Tables 1, 2; Figure 1).
- LAV22-001 was drilled to the east for 268 metres and intersected 48.5m of 1.03% CuEq (0.90% Cu, 5.80g/t Ag, 0.11g/t Au) within 95.05m of 0.54% CuEq (0.47% Cu, 3.24g/t Ag, 0.06g/t Au) from surface, confirming the presence of a significant, high-grade copper and associated gold skarn.

Commerce Resources Extends Mineralization Along Strike at the Ashram Rare Earth and Fluorspar Deposit, Quebec

The Company has recently completed its fourth drill hole at the Ashram Rare Earth and Fluorspar Deposit, with a total of approximately 1,003 m completed to date (Figure 1). The first two drill holes (EC22-194 and 195) were completed as step-outs at the southern end of the deposit in order to improve the confidence of the geological model in this area. The Company is pleased to report that both holes collared in rare earth mineralized fluorite dolomite carbonatite, as determined by geological core logging, and therefore, has extended the mineralized footprint at Ashram an additional ~100 m to the southeast..
