For years, Zimtu has established itself in Europe as a trusted source for European investments. We work hard to develop relationships in European countries because we know the value it has on our business and the companies we work with.

The Zimtu Road Trip is an essential piece of that strategy and ensures relationships are built and maintained with investors across the world. Every year, Zimtu fills a large bus with company representatives in the mining, tech, and energy sectors and drives across Europe to meet with investors and partners.

We organize investor events in Zurich, Geneva & Frankfurt with hundreds of European investors and the trip finished in Munich with the International Precious Metals & Commodities Show.

Gratomic Announces Second Progress Update on Benching Program at its Aukam Project in Namibia

Gratomic Reaches Extraction of 730 Tonnes of Graphite at the Aukam Benching Program

The benching process typically involves successively cutting berms alongside the mountain edge in order to steadily expose underground material, at the same time ensuring the stability of the mountain structure. This process allows for the collection of graphite in stages as the platforms are constructed on the Aukam mountain...

The Aukam mining team continues to extract graphite from the mountain as the benching program advances and today the Company has reached 730 tonnes of graphite successfully transferred to the ROM (Run Of Mine) stockpile...
